

ULISES S. GÓMEZ P.

FRONTEND DEVELOPER & FOUNDER — REACT · NEXT.JS · TYPESCRIPT

Buenos Aires, Argentina (Remote) · ulisesgopa@gmail.com · whoisulisesgomez.vercel.app
linkedin.com/in/whoisulisesgomez · github.com/ulisesgopa

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years building SaaS platforms, admin dashboards, and landing pages with React, Next.js, and TypeScript. Founder and co-founder of two technology ventures, with extensive experience deploying production web services alongside high-availability live TV and radio broadcasting infrastructure. Strong technical background combining board-level diagnostics, network architecture, and professional audiovisual systems to deliver systematic, root-cause-first debugging and solid digital platforms. 10 years total in tech. Open to remote roles.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks & Libraries:** React (hooks, component architecture), Next.js (App Router, Server Components), Astro, React Native (Expo, Expo Router)
- **State & Data:** Zustand, TanStack Query, REST API integration, Zod schema validation
- **Styling & UI:** Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, responsive mobile-first design, Figma-to-code
- **Infrastructure & DevOps:** Vercel, AWS, Linode, Cloudflare (DNS, SSL, routing), Git & GitHub, Vite, Playwright (E2E testing), Supabase, Prisma, PostgreSQL
- **Audiovisual & Systems:** Live Streaming Servers, Blackmagic switchers, CCTV, network engineering, tech support infrastructure

PROFESSIONAL EXPERIENCE

Santo Código

Frontend Developer

Remote

October 2025 – Present

Software development agency delivering complex web applications for multiple clients.

- Develop and optimize user interfaces for multiple complex web applications using React, Next.js, and TypeScript, ensuring code modularity and maintainability.
- Collaborate with design and product teams to translate Figma prototypes into highly interactive, accessible, and responsive components with Tailwind CSS.
- Improve site performance and SEO through Server Components, efficient caching strategies, and Core Web Vitals optimization.

Escuela Perritos

Founder & Frontend Developer

Buenos Aires, Argentina

July 2026 – Present

Canine education and behavior-modification platform.

- Designed and deployed the platform's digital identity and technical architecture, including PeludoTag, a QR-based lost pet recovery product built with Next.js and Supabase.
- Built a custom internal SaaS for end-to-end business management, automating tutor profiles, canine student history, premium service plan assignment, and financial flows.
- Implemented an automated payment receipt module with monthly due-date tracking, reducing manual administration time and streamlining operational cash flow.

Stream Tech

Co-Founder & Frontend Developer

Remote

February 2024

Technology company innovating in the events sector through streaming and ticketing products.

- Developed Ticketera MIES (ticketeramies.com), an event ticketing platform containing an admin dashboard, visual landing page builder, QR code check-in, and public event pages, built with Next.js and TypeScript over a NestJS REST API.
- Operated live TV and radio streaming infrastructure (Ant Media Server) deployed across AWS, Linode, and DonWeb Cloud, ensuring uptime for active broadcast channels.
- Built frontend interfaces and websites for streaming channel clients using React, Next.js, and Tailwind CSS.
- Configured domains, DNS records, SSL layers, and traffic routing with Cloudflare across multiple production deploy-

ments.

- Selected for Ruta de Emprendimiento 2024, a startup acceleration program focused on product and business model refinement.

TBS Wireless Services

Frontend Developer

Remote
December 2023 – December 2025

Partnership building the digital products of a Colombian telecom company.

- Built the company's responsive public landing page (tbswireless.com) using React, Next.js, and Tailwind CSS.
- Built an internal CRM that automated receipt generation, transforming a process that previously took 5 to 8 hours per day into an automatic issuance on payment confirmation, using Next.js 15, Prisma, and PostgreSQL.
- Designed a real-time dashboard with per-collector audit trails, KPI visualization (revenue, overdue accounts, collection rates), and dual sales modes (cash and credit), validated with Playwright E2E tests.
- Developed a point-of-sale system with DIAN electronic invoicing compliance (mipos.tbswireless.com) with a React + Zustand admin dashboard.

Freelance

Frontend Developer

Remote
January 2024 – January 2026

Frontend and web solutions for startups and SMEs across B2B trade, payments, retail, media, and pet services.

- Built LatinBridge, a B2B international trade platform with trilingual routing (ES/EN/PT via next-intl), an admin lead pipeline dashboard, and an AI-powered lead qualification assistant.
- Developed El Club Can, a premium dog training school web presence using TanStack Start, React 19, and Radix UI.
- Built the Octopay landing page (octopay.com.ar) for a digital payments platform with Next.js 15 and Framer Motion.
- Built Tienda Patitas, a complete e-commerce system: public storefront (React, Vite, TanStack Query), REST API (Bun, Prisma, PostgreSQL, MercadoPago), and admin dashboard with POS, inventory, and sales management (React, Zustand).

Freelance / Contract

Audiovisual Infrastructure & Real-Time Streaming Specialist

Colombia
2019 – August 2025

- Designed and operated technical infrastructure, internet networks, and real-time streaming servers for television channels, digital media platforms, and live broadcasts.
- Handled live multi-camera setups, CCTV operations, and high-fidelity video mapping to professional LED displays for massive corporate and entertainment events.
- Expertly managed broadcast-grade hardware switchers (Blackmagic), professional audio interfaces, mixing consoles, and custom live-streaming encoder configurations.
- Provided advanced IT technical support tailored specifically to broadcast environments, ensuring zero-downtime streaming transmission.

Self-Employed

Technical Support & Microelectronics Specialist

Venezuela
2016 – 2018

- Diagnosed hardware failures in mobile devices and performed board-level component repair.
- Applied systematic root cause analysis methodologies to resolve complex electronic issues, sharpening debugging habits now applied to software engineering.

EDUCATION

Frontend Developer — Platzi Web Development School

2022 – 2023

Certifications in Frontend Development and Programming Fundamentals: HTML, CSS, JavaScript, Git & GitHub, Mobile-First Design, Algorithms.

English for Beginners & Intermediate — Platzi English Academy

2022

LANGUAGES

Spanish — Native — English — Intermediate (professional reading, writing, and communication in tech environments)

SELECTED PROJECTS

Ticketera MIES (ticketeramies.com) · POS Colombia (mipos.tbswireless.com) · LatinBridge (latinbridge.net)
